SUMMARY

B.Tech Computer Science graduate who builds full-stack web apps: React and Tailwind CSS on the front end, Python (FastAPI) and SQL on the back end. Built a pricing engine with 7 REST endpoints, SQLite storage, 14 automated tests and CI on GitHub Actions, and a 13-route React e-commerce front end. Delivered 2 client websites in 3 months as an intern at Distil.

SKILLS

Languages: JavaScript (ES6+), Python, SQL, HTML5, CSS3

Front-end: React, Tailwind CSS, React Router, Context API, Framer Motion, GSAP, Responsive Design

Back-end & Databases: FastAPI, REST APIs, SQLite, MySQL, PostgreSQL

Core CS: OOP, DBMS, Unit Testing

Tools: Git, GitHub, GitHub Actions (CI), Netlify, VS Code

PROJECTS

Hero Cycles Pricing Engine | Python, FastAPI, SQLite, JavaScript hero-cycles-pricing.netlify.app

- Built a pricing engine for Hero Cycles where every part keeps a price history and each quote uses the price valid on its date; a new price splits the current window so older quotes stay unchanged.
- Exposed it through a FastAPI backend with 7 REST endpoints and SQLite storage, a CLI, and a plain JavaScript UI with a price admin page and saved, printable quotes; invalid part combinations, unknown parts and unpriced dates are rejected.
- Wrote 14 unit tests that GitHub Actions runs on every push, and deployed it on Netlify with the API as a serverless function.

Apna Fashion – E-commerce Front End | React, Tailwind CSS, Framer Motion apnafashion.netlify.app

- Built a 13-route streetwear store in React with React Router, covering home, category, product, search, cart, wishlist, checkout, login and an admin dashboard for revenue, inventory and orders.
- Managed app state with 7 Context API providers, keeping cart, wishlist, login and order history in localStorage, and added a spring-animated cart drawer with Framer Motion.
- Added live search suggestions in the navbar, a dark mode that follows the system setting, and a catalogue of 32 products across 4 categories with dynamic product and category pages; deployed on Netlify.

Portfolio Website | React, GSAP, Tailwind CSS koushikmaity.netlify.app

- Built a single-page React portfolio with GSAP scroll animations, an interactive SVG line chart of real UPI data and a case-study page per project; every push to GitHub redeploys it on Netlify.

EXPERIENCE

Distil Ventures Limited **Apr 2024 – Jul 2024**

Web Developer Intern

- Built and deployed 2 client websites within 3 months, working through daily stand-ups and manager feedback.
- Tracked and fixed 60+ layout, responsiveness and functional issues through structured testing, improving reliability across the client sites.

Turing **Mar 2026 – Aug 2026**

Business Analyst (Freelance)

- Reached 92% agreement with senior reviewers by evaluating 200+ AI (Gemini) responses a week against structured quality criteria.
- Validated 40+ data samples a week and flagged inconsistencies and recurring error patterns for correction.

EDUCATION

XIM University, Bhubaneswar **Aug 2021 – Apr 2025**

B.Tech in Computer Science and Engineering (Hons.) | CGPA: 7.06/10

CERTIFICATIONS

React JS – Infosys Springboard 2023

JavaScript for Beginners – Udemy 2023
