SUMMARY

Data Analyst who checks the data before trusting it: in one project I caught 333 products silently dropped during a CSV load that would have skewed the results. Built end-to-end projects in SQL, Python and Power BI on real public data of up to 34 million rows, from cleaning to dashboards and recommendations. Most recently a freelance Business Analyst at Turing.

SKILLS

SQL: MySQL, PostgreSQL, CTEs, Window Functions, Joins

Python: Pandas, NumPy, Matplotlib, Seaborn, Jupyter

BI & Reporting: Power BI, DAX, Power Query (ETL), Data Modeling, Data Visualization, Excel (Pivot Tables, Lookups), Dashboards, KPI Tracking

Analysis: Data Cleaning, Data Validation, EDA, Descriptive Statistics

Tools: Git, GitHub

PROJECTS

UPI Payments Market Dashboard | Power BI, DAX, Power Query koushikmaity.netlify.app/work/upi-payments-dashboard

- Built a 3-page Power BI dashboard on 76 months of official NPCI data covering 140+ UPI apps, combining inconsistent monthly Excel files with one Power Query function and a lookup table that maps 302 app name variants.
- Wrote 15 DAX measures including market share, YoY growth and HHI concentration; showed PhonePe and Google Pay at 78% of UPI transactions, with concentration at its lowest since 2020 as challengers like Navi grew to 4.8%.

Grocery Reorder Analysis | MySQL koushikmaity.netlify.app/work/grocery-reorder-analysis

- Loaded 33.8M order lines (3.4M orders, 206K customers) into MySQL and analysed repeat buying with CTEs, window functions and self-joins; found 59% of items are reorders and 12% of customers place 30% of orders.
- Cut query runtime by pre-aggregating the order lines into summary tables, and caught a silent data loss during the CSV load.
- Identified frequently bought-together products using lift (up to 18x) and recommended bundles and reorder reminders.

Flight Fare Analysis | Python, Pandas koushikmaity.netlify.app/work/flight-fare-analysis

- Cleaned and analysed 300K+ domestic flight fares across 6 airlines and 30 routes from raw scraped data, parsing messy price, duration and stop fields.
- Found fares rise ~1.7x when booked within 15 days of departure and ~2.4x in the last 3 days; showed weekend flights cost ~5% more even when booked early.

EXPERIENCE

Turing **Mar 2026 – Aug 2026**

Business Analyst (Freelance)

- Reached 92% agreement with senior reviewers by evaluating 200+ Gemini responses and prompts a week against structured quality criteria.
- Raised the quality of AI training data by validating 40+ data samples a week and flagging inconsistencies, exceptions and recurring error patterns for correction.
- Helped the team catch quality gaps early by tracking task-level KPIs and quality trends and reporting findings that drove process improvements.

Distil Ventures Limited **Apr 2024 – Jul 2024**

Web Developer Intern

- Built and delivered 2 client applications within 3 months, working through daily stand-ups and manager feedback.
- Identified and resolved 60+ application issues through structured analysis and testing, improving project reliability.

EDUCATION

XIM University, Bhubaneswar **Aug 2021 – Apr 2025**

B.Tech in Computer Science and Engineering (Hons.) | CGPA: 7.06/10

CERTIFICATIONS

Google Data Analytics Professional Certificate 2025

Data Analytics with Python – NPTEL 2024
